

DRY EYE SYNDROME

One of the most common problems treated by eye doctors

Estimated that over ten million Americans suffer from dry eyes

Dry eyes are unhealthy

TREATMENT OPTIONS

● ARTIFICIAL TEARS:

Many find relief simply by using artificial tears on a regular basis. Some of these products are watery and alleviate the symptoms temporarily.

● PUNCTAL PLUGS: Closing the opening of the tear drain in the eyelid

● NUTRITIONAL SUPPLEMENTS PLAY A ROLE IN HELPING TO RELIEVE DRY EYE

SYMPTOMS

- Itching
- Burning
- Irritation
- Redness
- Blurred vision that improves with blinking
- Excessive tearing
- Increased discomfort after periods of reading, watching TV, or working on a computer

Omega-3 essential fatty acids help your eyelids produce a normal, healthy oil layer that protects tears from evaporating and maintains tear production. In addition, it has been found these same Omega-3 essential fatty acids are used by the oil glands in the eyelid to make a healthy tear film oil layer.

Those deficient in co-factor nutrients, specifically the vitamins A, C, B6, and the mineral magnesium sometimes have difficulty in converting the Omega-6 fatty acid, linoleic acid, found in borage and other seed oils to the healthful prostaglandins.

BodySaver™ LLC provides the Dry Eye Saver™ Formula to assist the body in producing a healthy tear film to protect the eyes.

“ I have worn contacts for over 15 years and have had constant dry eyes.

In the past, I put drops in my eyes several times a day.

I have been taking the Dry Eye Saver™ for eight days and now, my eyes have never felt this good.

This is fantastic. ”

– Lisa C., Tampa, FL
